

## User/Developer Manual

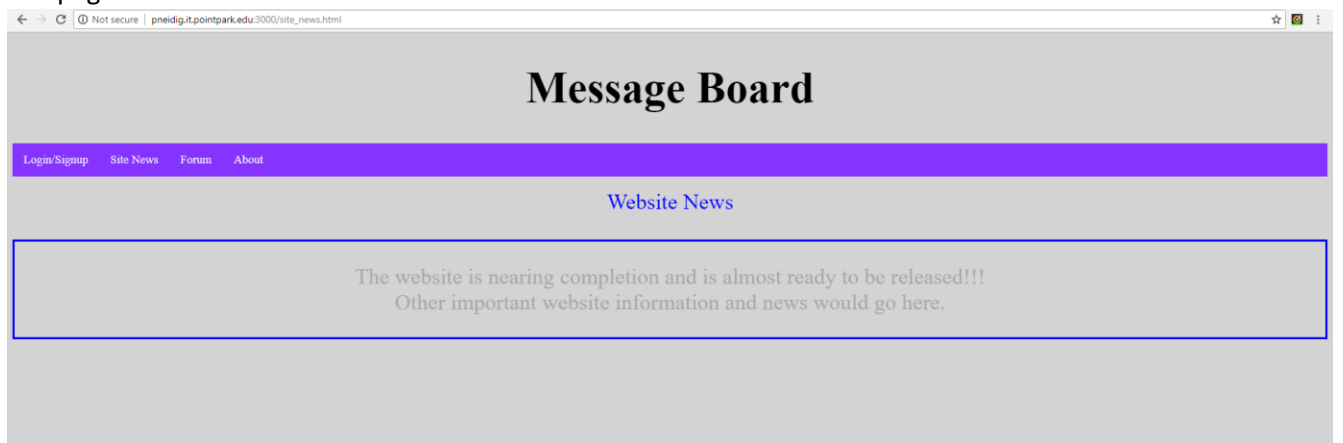

User profile – The website was designed for like minded individuals to come together to talk about video games and other things that interest them. This is a broad user range.

The message board is simple to use. Starting on the login page you can hypothetically enter your information and either login or signup for the website. The functionality of this page has not been completed.

A screenshot of a web browser displaying a page titled "Message Board". The browser's address bar shows "http://pneidig.it.pointpark.edu:3000/loginpage.html". The page has a grey header with the title "Message Board" in a large, bold, black serif font. Below the header is a purple navigation bar with links: "Login/Signup", "Site News", "Forum", and "About". The main content area is a light grey rectangle with a blue border. Inside this rectangle, the text "Login or signup here:" is centered. Below it are four input fields: "User Name:" with "User Name" entered, "Email Address:" with "Email Address" entered, "First Name:" with "First Name" entered, and "Last Name:" with "Last Name" entered. Below these fields are two buttons: "Login here" and "Signup". At the bottom of the rectangle, the text "New Member? Sign up by entering your information above and clicking signup" is centered, with "Signup" as a link.

The website news menu shows news blurbs about the website. There are no inputs or interactions on this page besides the menu bar.

A screenshot of a web browser displaying a page titled "Message Board". The browser's address bar shows "http://pneidig.it.pointpark.edu:3000/site\_news.html". The page has a grey header with the title "Message Board" in a large, bold, black serif font. Below the header is a purple navigation bar with links: "Login/Signup", "Site News", "Forum", and "About". The main content area is a light grey rectangle with a blue border. Inside this rectangle, the text "Website News" is centered in a blue serif font. Below this text is a large, light grey rectangle with a blue border. Inside this rectangle, the text "The website is nearing completion and is almost ready to be released!!!" is centered in a grey serif font, followed by "Other important website information and news would go here." in a smaller grey serif font.

The forum page is the heart of the message board. This is where a new post can be added, old posts can be read, and specified posts can be deleted. A counter in the bottom right can be used to view how many posts there currently are in order to keep track of website popularity and usage.

## Message Board

1	First Post Topic	1. Create a functional (working) interface. 2. Implement all agreed upon use cases. 3. Create one or multiple HTML pages. 4. Add styling with CSS. 5. Add interactivity with JavaScript. 6. Simulate interaction with the server (hard code JSON responses). 7. The interface should be minimal because you only have a week.	Delete This Post
29	When is the new Super Smash Bros coming out?	Someone tell me when the Smash Bros for the Switch is coming out!	Delete This Post
41	Test by Mark	Hello World!	Delete This Post
42	Game's Concept	I would like to see character information, and scenario descriptions.	Delete This Post
43	Visuals	I like bright colors, and would love to see eye catching visuals that grab my attention.	Delete This Post
44	Internet/app video games	What I would like to see are unlimited lives and bonus features without time limits between losses. If I lose all my lives quick or open up a bonus prize I don't want to wait 30min-24hrs to receive new prizes.	Delete This Post
45	Game Concept	What will the game be based on? What are the blank slides for? The message board is pieced together well.	Delete This Post
46	Game Concept	Also what age demographic will the game target?	Delete This Post
47	Testing	test	Delete This Post
48	Another test by Mark	Blah blah blah.	Delete This Post
